A COLLEGE FOR ROANOKE.

The announcement is made elsewhere in THE TIMES of the contract for the erection of the buildings for the Virginia College for Young Ladies. This sets forth the culmination of a project which has been in contemplation for several months. Rev. Dr. W. A. Harris, for the past twenty-eight years president of the Wesleyan Female Seminary at Staunton, was induced by his son-inlaw, Hon. R. A. Buckner, president of the Roanoke City Council, to investigate the many advantages of Roanoke as an educational center.

His high position as one of the leading educators of the Fouth well qualifled him to pass judgment in the matter. He found here a strong desire among a large, well-to-do and refined class of people for a school where their daughters could receive careful and advanced education under the most painstaking and thorough supervision of trained instructors in an atmosphere of lofty Christian culture, and within a few minutes ride of their homes. He found the warmest sympathy with the project of establishing such a school, and was shortly enabled to secure a tract in a beautiful and healthful sub. urb of Roanoke, commanding splendid views of the city and its surrounding mountain scenery. The contracts are signed, as stated, and another year will see inaugurated what will become one of the most famous educational institutions in the South.

It will be with no slight feelings of pride and gratification that the good citizens of Roanoke will learn to-day of this quiet work soon to be undertaken. Without dwelling upon the [material advantages of having practically in the city a college for young ladies which will draw pupils from many States, it will give a more decided impetus in to the higher sentiments which place education and intelligence above the more material virtues of wealthcreating and industrial development.

Coming as it does with the waning of 1892 we look back over the vieta of the year and feel sure of being sustained in declaring this announcement as the most important for the good of Roanoko which the year has brought forth.

The Juniors' Fair-The Juniors' fair was crowded last night. About thirty couples participated might. About thirty couples participated in the cake walk, which was won by Miss A. F. Webb. Will A. Carr performed on the piano and J. Oyler, as a clog dancer, elicited much applause. The contest between Miss Annie Vanilla and Miss Estel Clinedenst is attracting a great deal of attention. A contest has been arranged between Prof. P. C. Leary, of the Machine Works, and Goo. W. Ra seey, of the general offices. Trinight a sack race will be the special attraction. On Monday night the grand torchlight parade by all the companies of the department will take place.

Completing the Jail. After a long delay, the new jail is about ready for occupancy. The gasfitters have a little to do yet, and, with a few finishing touches, the building will be turned over to the city. The first of next week will see the prisoners in their new quarters, and the public will be glad to know that their worst enemies are well housed, and that the expense of transporting prisoners and officers has stopped.

The Leading Churches. The Leading Churches.

The most of our leading churches use the Estey organ, some of which we will name: First Calvary, Calvary Baptist, Trinity M E Souch, St John's Episcopsi, Christian Church and many others. This is the best evidence that the great Earey organ stands at the head. Hobbie Muric Company, sole dealers, 197 Salem

weeks since parties from Ohio and other points were negotiating with the Central Land Company to move to this point a plant to manufacture tubs, buckets, clothes pins, etc.: indeed, use every portion of a tree save the twigs and leaves. The trees they proposed to use are cedars, poplars and other soft woods. They examined the timber and country in this section and were very much pleased, but the Central Land Company thought their demands too exorbitant and very properly did not close with them. A few days since parties from New York were here negotiating to establish a plant to manufacture porcelain tubs, bath-tubs, etc. This would be a valuable adjunct to our Plumber's Supply Factory, as the products of the one would create a demand for the other. We hope ere long to have this last plant in successful operation. Both the Smith & Briggs Plumber Supply Works and the Franklin Brass Works are moving along, each with three months' orders ahead, and, notnotwithstanding the hard times, turning out and shipping a large amount f work. One other thing would add greatly to our prosperity and is also a matter of great importance to Roanoke, viz., a connection between the Chesapeake and Ohio and Norfolk and Western railroads at this point. This could be made through the old town at a very small cost, and the Central Land Company have a steel bridge already constructed and paid for, which, no doubt, they would contribute to parties who would put it up and use it. The furnaces in Roanoke and along the line of the Norfolk and Western want the rich hematite iron ores along Craig's creek and on Rich Patch and Purgatory mountains and the pure limestones on the line of the Chesapeake and Ohio railroad, as well as the competition from the New river coke. So the furnaces on the Chesapeake and Ohio railroad want the competition or the Flat Top coke. A very small cost compared to its value would construct this connection. and attractive, nor prices so low as now.
